

Home Page as seen below: click anywhere or press any button to launch main application

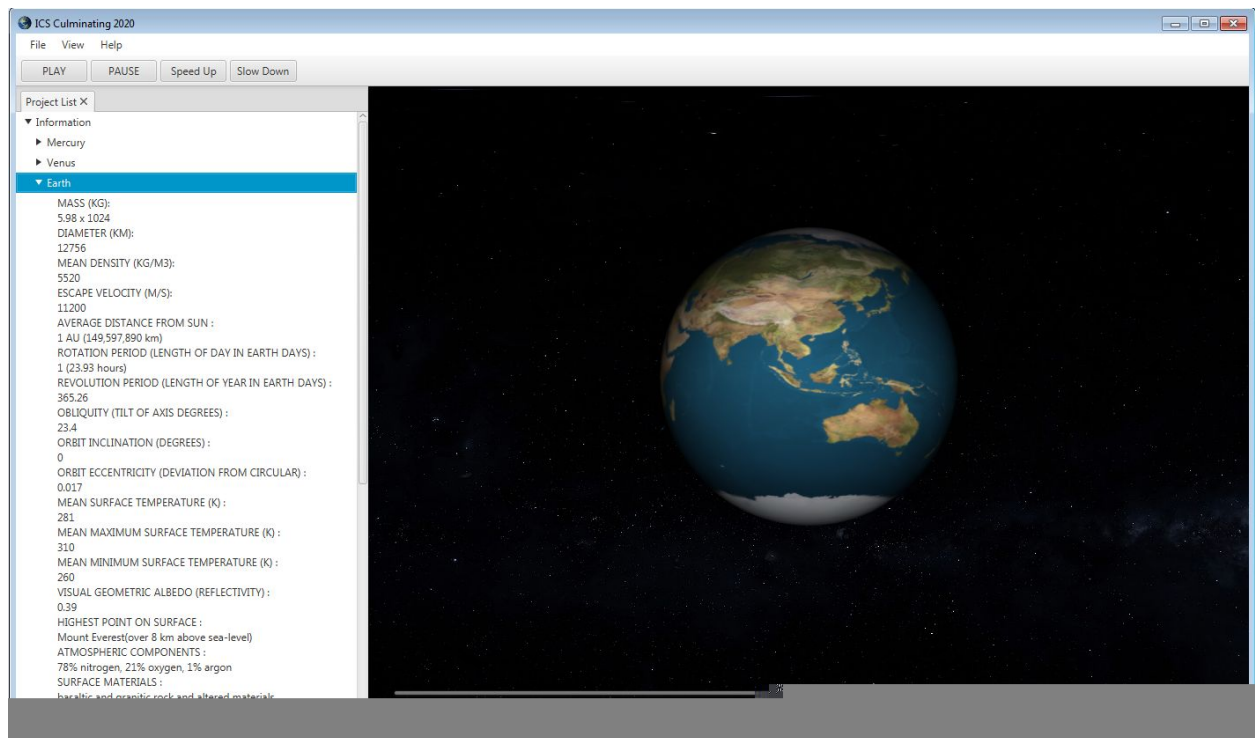

The Control menu bar allows you to play, pause, slow down and speed up the rotation of the planet being displayed.

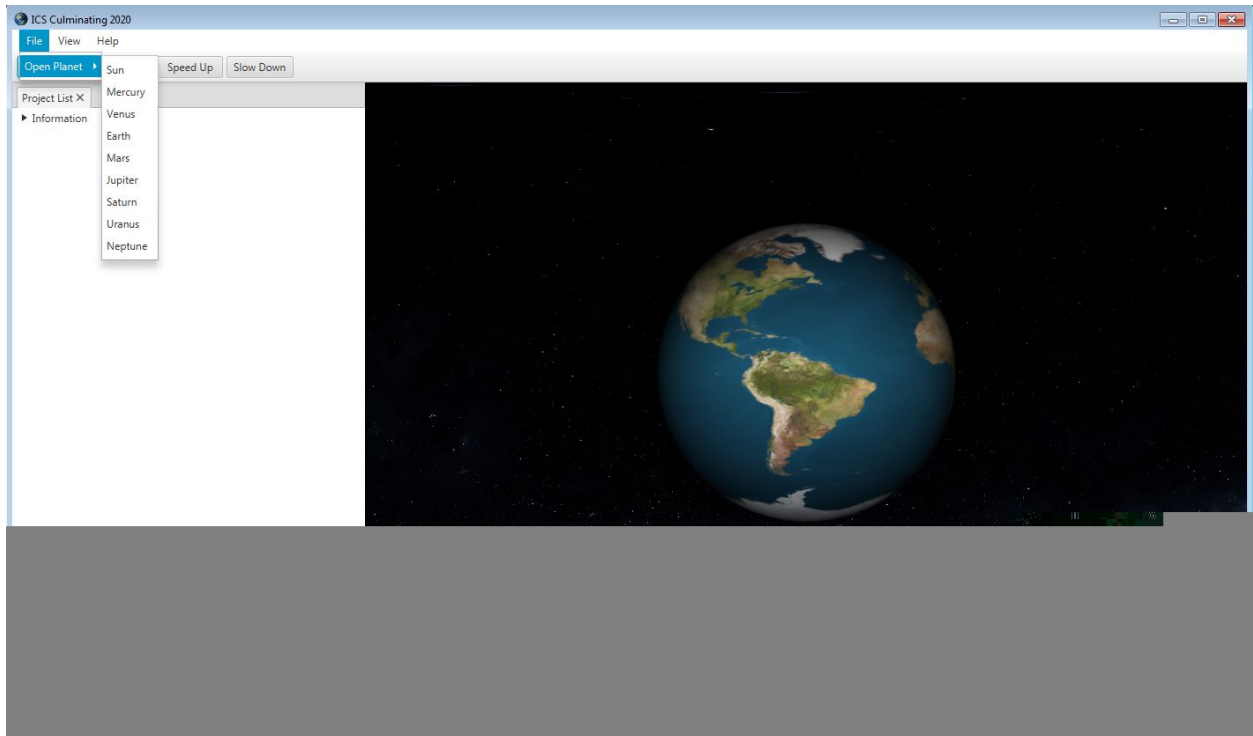

The slider bar allows you to zoom in and out of the planet that is being displayed

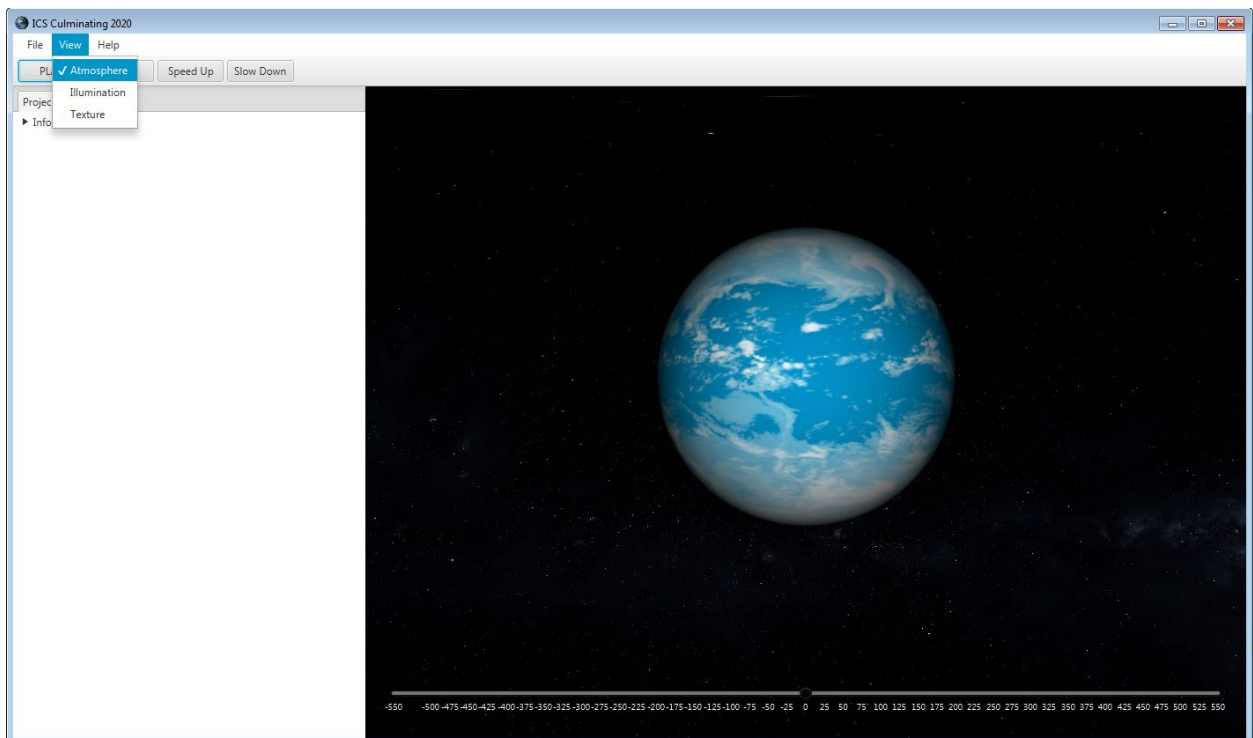

The tab on the left allows you to expand information taken from NASA's database. This includes all of the possible planets that can be displayed.

The File → Open Planet allows you to select with planet that you want to choose from, the choices are shown in what is available in our database.

The View→ Atmosphere/Illumination/Texture allows you to choose additional maps to view (note: if the map is not in the database (image resources file) nothing will show up)

The Help→ User Manual allows you to open a pdf to show the user manual instructions (in case something is not clear)
